

I am strongly opposed to the National Association of Broadcaster's (NAB) petition 04-160 to place limitations on satellite radio. Satellite radio is an essential alternative to the conventional corporate-driven AM-FM radio stations. As a citizen I should have the right to purchase these alternative radio services. This petition is, undoubtedly, only the beginning of what will be an ongoing attempt by NAB to stifle satellite radio altogether. It would be a tragedy if the FCC allowed that to happen. I urge you to reject petition 04-160. Thank you.
